k. Description of Request: The licensee requests a one-year temporary variance from the operating requirements of the Commission's November 21, 2013 Order Issuing New License and Denying Competing License Application. Specifically, the licensee requests to operate its turbine in cycling mode, lower the flashboards and the operating range of the reservoir elevation, continuously spill 10 cubic feet per second, and keep the existing flow valve closed unless otherwise authorized by the Connecticut Department of Energy and Environmental Protection. Due to economic shifts, the licensee indicates that it is no longer feasible to install a low-flow turbine that had been paramount to being able to comply with the license conditions. The licensee requests this variance in order to maintain compliance while determining an appropriate alternative operating scenario.

All comments, motions to intervene, or protests should relate to project operations, which are the subject of the variance. Agencies may obtain copies of the application directly from the applicant. A copy of any protest or motion to intervene must be served upon each representative of the applicant specified in the particular application.
